ARCHÆOLOGICAL SURVEY OF MYSORE.

Annual Report for the year ending 30th June 1894.

---

1. The Survey was continued over five more Taluqs, completing the Mysore and Hassan Districts. The number of inscriptions obtained and copied *in situ* was about 520.

2. *Epigraphy.* Of the more interesting finds may be mentioned a copper plate grant by the Kadamba king S'ivamṛigêśa-varmmâ in the 7th year of his reign, belonging to the 5th century. It is almost unique in being a grant to an Âtharvani Brahman. The characters are what are called box-headed, the tops of the letters being like those of farriers' nails. Another valuable copper plate grant obtained was one by the Gaṅga king S'rîpurusha, belonging to the 8th century. It is well engraved in a somewhat larger type of character than usual with the grants previously found of this reign, and was the work of a different engraver, named Kunâchâr,ya, who has not been met with before. It records an endowment for feeding Brahmans, made on the birthday (*śrî-nakshatra*) of the king's *bhaṭâra* or *guru*, who must have been a Jain. The grant resembles the stone inscriptions of this period in being very brief and confining itself to the particular business in hand.

3. Another Gaṅga grant, obtained by Dr. Fleet and kindly lent for inspection, is dated in S'aka 860 and belongs to the time of Pûtuga, whose exploits are recorded in the Âtakûr stone. The capture of Peñjeṛa from the Pallavas is mentioned and various other important particulars are given. Further confirmation of some of these is contained in a stone inscription of the time of Akâlavarsha, also obtained by Dr. Fleet, dated S'aka 896. In this we find Bhujabbe, the mother of a later Bûtuga and apparently the grandmother of Mârasiṅgha the Noḷambakulântaka, governing at Peñjera. This is the same place as the Heñjeṛa referred to in last year's Report as occurring in some professedly very ancient grants. There seems no doubt that it may be identified with Hêmavati.

4. Among the stone inscriptions met with was one of the time of the Râshtrakûṭa king Dhârâvarsha, which belongs to the 8th century. In this we find Kambharasa governing the Ninety-six Thousand, or Gaṅgavâḍi, which is an item of great importance, as he may be identified with the S'rî-Kambaiyan of rock inscription No. 24 at S'ravaṇa-Beḷgoḷa, and with the S'aucha-Kambha-Dêva of the Maṇne copper plates mentioned in my Report for 1891—2. The Navalôka of the former should probably be corrected into the Raṇâvalôka of the latter. He was a prince of the royal family, apparently son of Dhârâvarsha and brother of Gôvinda. Dhâṛâvarsha having taken the Gaṅga king prisoner, evidently appointed his own governors or viceroys to administer the affairs of the Gaṅga territories. Another stone inscription met with records the death of the Ganga king Eṛeyappa, and the attempts that were made to secure the throne for his son Râchamalla. But from the Âtakûr stone we know that the latter was killed by Bûtuga, who thus gained possession of the Gaṅga kingdom.

5. Other old Gaṅga stone inscriptions found were one of S'ivamâra, belonging to the beginning of the 9th century, and two of the time of Mârasiṅgha, dated in S'aka 892 and 893. Several inscriptions of the time of Râjêndra-Chôḷa were met with, engraved in Haḷa-Kannaḍa characters. The whole of the Choṅgâlva family, who were chiefs of the country on the banks of the Kâvêri bordering on Coorg, seem to have adopted Chôḷa

names. A Hoysaḷa inscription of S'aka 1105 gives us a second version of the interesting historical accounts relating to the Mariyâne family in the time of Vinayâditya as contained in the Sindigere inscription.

6. Some boundary stones in the Berambadi State Forest were examined and copied at the request of the Inspector General of Forests, and the use of the monogram ಠ satisfactorily identified as the Government mark whose use was introduced by Chikka-Dêva Râja of Mysore and continued by subsequent rulers to a comparatively recent date. This identification will probably modify some of the views that have been published regarding certain coins bearing that symbol.

7. A fresh set of impressions, better done, was taken of the Aśôka Edicts discovered by me a short time back, and photographs of these were sent to Europe. In acknowledging them, Professor Bühler, who is preparing articles on the subject, writes that the discovery of these inscriptions seems to him more and more valuable, both for the history and the palæography of ancient India. Plans for structures to be erected for conserving the inscriptions were received from the Executive Engineer, and returned with suggestions for certain alterations. Nothing more has been heard of the matter since

8. The local objections to the removal of the important Atakûr stone, which was first discovered by me in 1886, having been overcome, orders were issued by Government for its transfer to the Museum at Bangalore, where it will be available for study and be protected from injury. Some other good stones are in process of acquisition for the Victoria Jubilee Institute at Mysore.

9. In regard to the publication of the results of the Survey, a volume on the Inscriptions in the Mysore District has been completed and is in the hands of the binders. This deals with 803 inscriptions, which, added to 144 at S'ravana-Belgola previously published, makes nearly a thousand finally disposed of.

10. The following is a statement of the details of printing completed up to the end of the year, omitting those at S'ravana-Belgola :—

District.	No. of inscriptions printed.	Kannaḍa: pages.	Roman: pages.	Translations pages.	Press.
Mysore, Part I ...	803	381	218	117	Government Press, Bangalore.
„ „ II ..	435	176		.	„ „
Hassan ...	362	304	24	...	Basel Mission Press, Mangalore.
Kadur... ...	206	164	44	...	Caxton Press and Govt. Press, Bangalore.
Shimoga ...	209	168		...	Government Press, Mysore.
Bangalore ...	129	48	...	. .	Vichâra Darpana Press, Bangalore.
Kolar	166	36	...	...	Châmuṇḍês'vari Press, Bangalore.

Arrangements have since been made for printing the inscriptions of the Chitaldroog District, and it is hoped that those of Tumkur District can also be provided for.

11. An additional pandit has been engaged, specially to assist in the laborious work of correcting proofs, and he will also be able to help with the large amount of transliteration to be done. The Assistant who was appointed to this Office was never able to take up any of the work, owing to employment elsewhere, and has now been provided with a different appointment.

12. *Sculpture* and *Architecture.* The following have been noted as examples specially deserving of attention. The Kêśava temple at Dharmapura and the Îśvara

temple at Mâkôḍ, both in Hunsur Taluq. Also in Chanraypatna Taluq, the Lashmî-Nârâyaṇa temple at Ânati, the large double temple of the Hoysala period at Agrahâra-Belaguli, and the ruined Jain basti at Haḷe-Beḷguḷa. The Mâkôḍ temple has on its front wall a singular piece of sculpture, representing, in a perpendicular series, a *ganda-bhêrunda* holding up a *sarabha*, which is holding up a lion, which is holding up an elephant, which is raising with its trunk a serpent, which is about to swallow a buffalo. There is a figure of a man at the foot, apparently looking on.

13. *Numismatics.* In connection with the finds of coins reported to Government, specimens have been received for examination. Of the gold coins found in the bed of the Ramaswami channel, one is a Vijayanagar coin, bearing on the obverse S'iva and Pârvatî seated, and on the reverse the legend *S'rî-Pratâpa-Deva-Râya* in Nâgarî characters. The copper coins, found in the breached tank at Katral in the Chitaldroog District, are Muhammadan, but mostly so much abraded as to have lost all trace of anything on them. One or two, however, retain some indications of a name in Persian or Arabic characters, not yet deciphered.

14. *Literature.* The accounts published by me, in the Introduction to the S'abdânuśâsana, on the subject of Kannaḍa Literature have begun to attract attention and interest. A learned Society in England has offered to devote a number of its Journal to it and publish it as a separate book, on my furnishing a revised copy with all additions and discoveries up to date. Also the Professor of Pâli informs me that, as a result of my discovery of the Aśôka Edicts here, the Pâli writings have been examined and a number of references found in them to Buddhist scholarship in this part of India. My essay is moreover being made the basis of a Cyclopædia of Kannaḍa Literature to be published in Mysore, on the model of Chambers' work on English Literature. The Kâvya-mañjari continues to print a good selection of old works that I had brought to light.

15. The completion during the past year of the Kannaḍa-English Dictionary which has for several years been under preparation by the Revd. F. Kittel of the Basel Mission, deserves to be noted here, as I was mainly instrumental in obtaining for the work the help of the Mysore Government.

16. It seems of great importance that the effect so far produced in directing attention to the Kannaḍa Language and Literature should be well followed up, and proposals will be submitted for obtaining effectual assistance in this branch of work.

17. *Gazetteer.* The compilation of the new edition of the Gazetteer has occupied a good deal of my time and about 150 pages are going through the press in England. I hope to be able to report much progress in this work during the ensuing year.

L. RICE,
Director of Archæological Researches in Mysore.

Report accompanying the Estimate for Repairing the Eswara temple at Makod, Hunsur Taluq. —

Reference

Executive Engineer's No. 2974/628 Dated 8th September 1894. —

Report

This Eswara temple of Makod is situated in the middle of this village in north Latitude 12°—24 and East Longitude 76°—16" in Topo sheet No: 53. The accomodation of temple is the same as that of Keshava temple at Dharmapur, but this temple is 8¼ feet high in-side whereas the other is 9¼ feet. This is, moreover, in a better condition than the other one except the repairs required & the roofing which is very badly leaky. This is said to have been built by Chola Rajas and has a greater record of antiquity

antiquity about it than the other as also about the various figures cut on the Stones of the walls par= =ticularly that in a perpendicular Series commencing from Gunda Bherundee down to the Buffalo & and the man Standing at Sook. This is said to tell something mysterious and has, it is believed, an occult Significance. — It has no endowments and is Solely dependant for its maintenance and other "Sitswans" on the Simple charity of a few Lingayet ryot population there and the Villages about. —

Provision has been made in this for breaking up and removing old concrete (the whole of it) and laying a 6" layer of Brick in Surki Concrete and two courses of Slab tiles laid over and plastered. Similarly as for the Dharmapur temple a parapet wall all round has also been provided for with weep holes

at convenient distances for draining off the rain water. Out of the lumpsum of Rs 20/-, Jungle plants and roots growing in the joints of structure will also be removed. Inside the temple where it is marked ⁂ a and ⁂ b, the corbel over the pillar is cracked and it is feared it might not bear the weight of the girder over it and roofing so well as it otherwise in its original condition. Hence provision has been made for supporting it up with two new stone posts. In order to remove the shabbiness of appearance that hangs about it, and to make it look tidy, provision has been made for pointing the joints in the walls of the structure inside and outside as also the underside of covering slabs. This temple being situated at an out of the way locality rates have been slightly higher than in the more

those obtaining on roads &c and Stone Slabs have been put down at 12 annas a cubic foot, since the Bettadapur Quarry is 9 or 10 miles from it. Request that these rates are fair and bear no re-duction and consequently may be passed.—

13.

Report accompanying the estimate for Repairing the Kesava temple at Sharmapur Hunsur Taluq:—

SECRETARY'S OFFICE
RECD NO. 95
11 Jany 95
MYSORE P PT.

Reference.

Executive Engineer's No. 2974/628 dated 8th September 1894.—

Report.

This Keshava temple of Sharmapur is situated in the middle of the village in North Latitude 12°—14" and East Longitude 76°—25¼" Topo Sheet No. 54 (old). It has fine specimens of architecture all round its walls on the outside in the same way as that of Aravalalu in Attikuppa taluq with the marble or Balapina copings, and cornices finely carved and rounded off & drain off water. This temple is said to be of the date of Chola Rajas and has long remained in this state. Inside the temple, there is a Sasanam & and 3 or 4 images 3 to 5 ft.

feet in height which are skillfully worked very nearly equal to those of Hale Bede temple in Belur Taluq. The rear wall of Garbha Gudi marked from M. to P. as 21 feet in length (in plan) tumbled down, it would appear, some 15 years ago which was for some time kept up with Earth backing and subsequently built of Brick in Chunam by the Ryots. This requires a little building up here and there. The waiting room B and the Hall F as also the Garbha Gudi for 6 feet width along South edge are leaky in their roofs especially along the edges only for 6 feet in width in consequence of the existing concrete being very much damaged and jungle plants and long grass growing on them.—

Provision has been, however, made for removing all the old concrete and laying on a new 6" thickness of Brick in Surkhi one in its place and two courses of flat tiles laid

and

and plastered over with parapet walls all round along the edges providing weep holes at convenient distances. ——

Chunam pointing for the underside of covering slabs and vertical walls of temple inside and outside have also been provided for, so that the building might look neat and clean. Carved copings along the edges have tumbled down to some extent and provision has been made herein for resetting these as well as the loose portions thereof. Any deficiency that might appear in replacing these of which many are broken will be made up base with ordinary cornice out of the lumpsum provision made for different items, since such new carved things cannot be turned up in these days within reasonable cost at these localities. If any such skilled labor be available at the time and also the same sort of

Mukteswara.

materials this work will be fully turned out. The south wall of the hall in one place and the north wall in two places have gone out of perpendicular and if these are not looked to now they may tumble down in course of time. It has therefore been herein provided for, for propping up these with stone girders 14 feet long and 1 foot thick fixed slanting, resting against the walls like buttresses and well fixed into ground. —

A lumpsum of Rs 30 has also been provided for, for removing old concrete and jungle plants and roots in the joints of the structure of the temple as also Rs 20 for repairing doors resetting the openpial and steps. —

This temple has no endowment and it is dependant for its maintenance as also for its "Utsawams" &c on the offerings of the devotee public.

C. L.

17 but it is said the Archak gets a small income out of the rental proceeds of an inam land set apart for the temple. —

This village is situated almost in the midst of the jungle tract bordering on Heggadevankote taluq and quite isolated from the too-oft visited localities. It is about 3 miles distant from the head of each of the channels called Megalore and Dasanpur forming the Hanagode Series. In consequence the rates herein provided for are those usually paid on this channel work, and those items which are not met with in channel estimates are estimated at rates considered fair having regard to the locality, difficulty of procuring labor and materials and requests they may be approved of. —

Sanctioning two estimates for repairing the Eswara temple at Inokod and the Kesava temple at Dharmapura

From D.C. Hassan No 2998/1895
From Mysore 15-21 1347

1895
Muzrai

Read:—

Para 12 of the annual Report of the Mysore Archaeological Survey for the year ending 30th June 1894 bringing to the notice of Govt the ~~margin~~ marginally* noted temples as examples of sculptural & architectural structures specially deserving of conservation—

And:—

Correspondence ending with letter Camp No 43 dated 20th January 1895 from the Chief Engineer, of Mysore, reporting on the state of the temples referred to in the above and forwarding estimates for the repairs of the Eswara temple at Mokod and the Kesava temple at Dharmapura.

* 1. Kesava temple at Dharmapura } Humnabad Taluk
2. Eswara temple at Mokod }
3. Lakshmi Narayana temple at Aroli } Chennarayapatna Taluk.
4. The double temple of Betteswara and Chennakeshava in Belaguli
5. Jain Basti in Hale Belaguli

Vide Order thereon:— No. 873-7 dated 29-3-95, Encl. 1-4-

The temples referred to in the above do not receive any Muzrai Yasdiks. But still, taking into consideration the architectural value of the temple buildings as reported upon both by the Director of Archæological Researches & the Public works Dept. the Govt. are pleased to direct that they be repaired at state cost. For this purpose, a special grant of Rs 2000 from state funds is sanctioned, and the Comptroller to Govt. will be requested to provide this amount in the Muzrai Budget for 1895-6, in addition to the state grant of Rs 15000, ordered in Govt. Pro. No. 749 Muz. F. 105-92 dated 25th February 1895.

2. The two estimates forwarded by the Chief Engineer, are for Rs 427 to repair the Eswara Temple at Mokod, and the other for Rs 593, to repair the Iswara temple at Dharmapura, both in the

the Hunsur Taluk of the Mysore Dt, are now sanctioned, their cost being met from the sum of Rs 2000 specified in the foregoing para; and the works will be carried out in the Muzrai Dept, under the supervision of the Dy Commr of Mysore Dt to whom the estimates in question will be forwarded in originals.

3. The other 3 temples ~~noted~~ noticed by the Director of Archaeological Researches are (1) the Lakshminarayana temple in Arsikere, (2) the double temple of Betteswara and Chenna Kesava ~~Keshava~~ in Belaguli and (3) the Jain Basti in Hale Belaguli. All these 3 temples are in the Channarayapatna Taluk of the Hassan Dt and the Dy Commr of the Dt will now be requested to prepare, in communication with the Dt Executive

Engineer and submit for the sanction of Govt., regular estimates for the necessary repairs to those 3 temples situated in the Chennarayapatna Taluk. A copy of the Executive Engineer's report on the state of the temples in question, received with the Chief Engineer's letter read above will be sent to the Dy Comr for his information.

Mr Nagarkar, in his report on the Lakshmi Narayana temple at Anati, states that the villagers are very enthusiastic about its restoration and may contribute towards it. The Dy Comr, therefore, will also be requested to ascertain and report what portion of the estimated cost of the repairs to this temple, the villagers will contribute.

SIR.

With reference to your docket No. 3501/850 dated 25th August 1894 forwarding copy of para 12 of the Annual Report on the Archaeological Survey of Mysore for the year ended the 30th June 1894 and enquiring as to the present condition of the Késava temple at Dharmapura and the Janardana temple at Makod in the Hansur Taluk, I have the honor to report that both the temples were inspected (the former on the 14th and the latter on the 8th of January 1895) by Mr. Venkata Rao, Assistant Commissioner. He reports that the Janardana temple is sinking considerably and that cracks [illegible]

in front and in other parts of the temple are mutilated. The temple of Késava — some of whose idols, alleged to be the work of Jakana char, are exceedingly beautiful — is said to be in no better condition. It is also stated to be in disrepair. Estimates for Rs. 1020 for the repair of both the temples were lately sanctioned in the Muzarayi Department and the work is now put in hand.
